

Welcome to Active Earth

presence - connection - change

Active Earth helps people and organisations to connect, find presence and change.

We help **businesses and organisations** find new insights and a clearer sense of direction to navigate complex sustainability related challenges. We collaborate with **business schools and universities** to bring innovative approaches to sustainability education. We host Summer Schools for **young people** from around the world to make new friends, explore new questions and enjoy life-changing adventures in places of great natural beauty.

We are dedicated to delivering transformational learning experiences of the highest quality.
We are Active Earth.
